Subject: Re: Chemours

Cecil,
Thank you. R5 was also asked to notify Ohio DEP.

Update on where we are:

The draft desk statement and draft Q&As are making their way through the HQ review. ORD, OW, OECA, OCIR and OPA all are weighing in on both docs.

To expedite this review, I suggested coordinating issuance of the letter on Monday and provided these offices with a mini comms plan that includes notifications after the letter is issued to R5, HQ, public affairs and Liaisons, States (WV and Ohio), congressionals, etc. to assure the HQ offices that we have a well thought out rollout plan. (Hoping this will eliminate the numerous inquiries we're receiving from various offices in HQ.)

HQ wanted to make the letter available in some way without drawing attention to it so we're awaiting their response as to whether they can post the letter on their PAFAS page.

We're awaiting their response to the plan, the issuance day, and the finalization of the desk statement and Q&As. Thank you.

I talked to Scott Mandirola of WVDEP about our letter and further coordination on the Chemours facility. I agreed to provide the finalized version of the letter.

Joan please coordinate with WVDEP communications people and share our desk statement.

WVDEP is working on reissuing of the discharge permit for the Washington Works facility. Scott wants to continue to work closely with EPA on developing numbers for C8 and Gen X.

Lets discuss more next week.

Thanks. Cecil
